Description

A dynamic programming language which aims to distract you from getting anything done by making most keywords related to dogs / puppies.

The language is implemented in Javascript and runs under the Node.JS runtime environment

Install

This project requires the installation of NodeJS (which comes with the Node Package Manager)

See install

```
make install
```

Usage

Run **puppy-script** from the command-line without any arguments to see usage

Look at the **examples** folder to see how to use the recognizer and lexer
